FACTORS FOR MENTAL HEALTH
PROBLEMS AND ATTRITION
AMONG LICENSED ATTORNEYS**

Why Are Legal Professionals at High Risk of Mental Health & Substance Use Disorders?

- Conflict driven and adversarial profession (you see some of the worst of humanity)
- You need to be emotionally detached to get through your caseload
- Perfectionism
- Excessive self-reliance

These traits are great for a successful career but not so great for mental health.

Why Are Legal Professionals at High Risk of Mental Health & Substance Use Disorders?

- High expectations and accountability
- Lack of work-life balance
- High stress level
- High stress levels & work-weeks >50 hrs. are consistent predictors of SUD's and their severity.
- 67% of attorneys/judges work more than 40 hours/week.
- Inherent pessimism

THE CONSPIRACY OF SILENCE

- Lawyers are trained to deal with and solve problems. Thus, it is most difficult for the lawyer to seek help since by doing so he/she feels he/she is admitting failure.
- Complicating this problem further is the tendency of the lawyer's peers to indulge in a conspiracy of silence (enabling) and lighten the normal stresses of our profession.
- Concerns that receiving help may impact future election/reputation in the community.

Dealing with *DENIAL*

- DENIAL = "don't even (sic) now I am lying"
- The most potent barrier
- Psychological defense mechanism
- Rationalize and minimize behavior
- Honestly believe they are under control
- I'm not one of "them" mentality

Disciplinary Statistics Relevant to Impairment Issues

- When untreated, the lawyer's capacity to practice law is almost always impacted
- Studies show that **25-30%** of lawyers facing disciplinary charges suffer from some type of addiction or mental illness
- Many other attorneys belong in this category but are not listed because they default in the disciplinary proceeding or lose their licenses without ever appearing or answering

—
Lawyers who do not appropriately address their personal issues can harm the judicial system, destroy their own careers, and sometimes even lose their lives.

YOU MATTER!

- What to do?
 - Identifying signs in others & ourselves
 - Approaching the lawyer

WHAT
SHOULD
I DO

To Call LCL for someone else...or Not to Call...

- Is this really any of my business?
- I want to help but I don't want to get involved.
- Will I harm his/her or the firm's reputation?
- Must I report him or her to Discipline?
- I already tried to help and it didn't work.
- Let's wait and see. Maybe it will get better.
- I really don't have time for someone else's problems.
- What if I am wrong?
- I don't want to lose a friend...

BUT....WHAT IF YOUR CALL SAVES A LIFE???

Watch for Changes from Baseline

- Everyone has a baseline for personality traits
- Warning signs are always relative to the person's baseline
- Follow the MAP*
 - Mood or attitude changes
 - Apppearance or physical changes
 - Productivity - Changes in/quality of work

* Belleau & Pacione, ABA Solo Practice Journal 2015

- ABA Formal Opinion 03-429 (2003)

The first step may be to confront the impaired lawyer with the facts of his impairment and insist upon steps to assure that clients are represented appropriately notwithstanding the lawyer’s impairment. Other steps may include forcefully urging the impaired lawyer to accept assistance to prevent future violations or limiting the ability of the impaired lawyer to handle legal matters or deal with clients.”

To Call LCL for self...or Not to Call....

I'm ok. I can work this out for myself.

I'm not like a "real" alcoholic anyway.

I want help but I don't want anyone to know.

Will I be reported to the Disciplinary Board?

I already tried to get help and it didn't work.

I don't have the money to pay for treatment.

What will people say about me if I ask for help ?

It's no use – nobody will understand – I give up!

"I can THINK my way out of this."

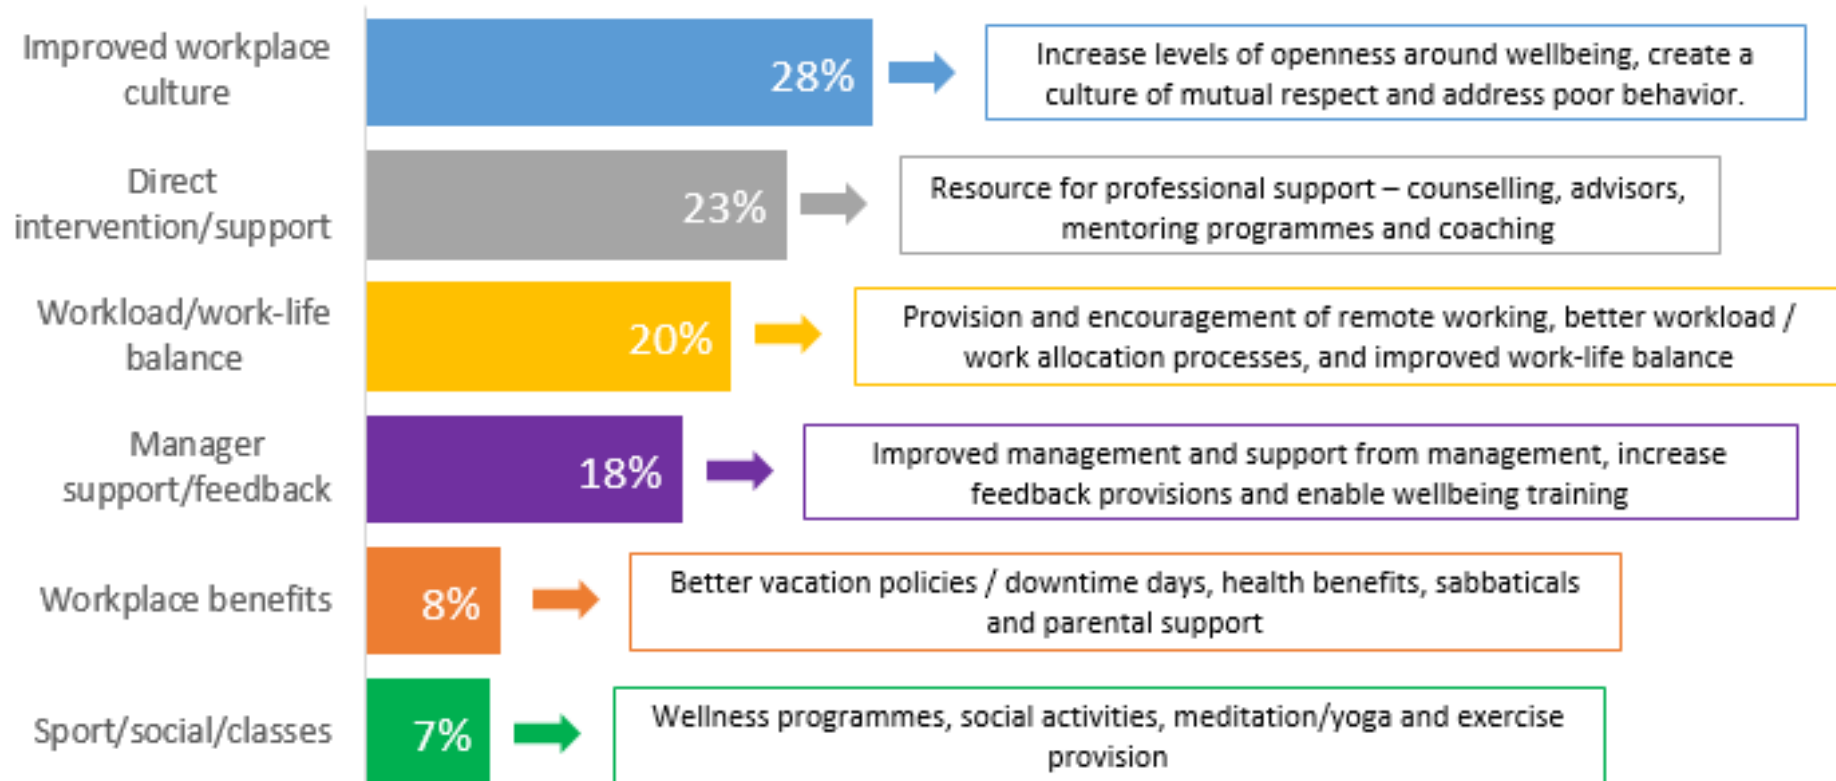

What Can The Firm Do?

What more should a firm do?

Desired improvements largely focus on cultural change and intervention, better workload provision and increased support from management

So.....what
can one
person do?

Impossible

Set *REALISTIC*
Goals for Yourself

“The key is not to prioritize what's on your schedule, **but to schedule your priorities.**”

- Stephen Covey

Prioritize your day

- Step back and look at your "to-do" list.
- How many items are "critical" and **MUST** be done that day?
- What are you working to achieve?
- Create a plan that will work with your schedule.

THEN schedule your priorities

- **DON'T** have 10 things on your list – focus on 3 or 4!

PRiORiTiES

- 1.
- 2.
- 3.

UTILIZE QUICK STRESS-BUSTERS

- Pause. Lean back, literally. Give your eyes a rest for a couple minutes.
- Take three deep breaths and imagine your muscles relaxing from head to toe.
- Be mindful. Focus on the immediate present. Enjoy the moment.
- Stretch. Walk around your office or go outside.
- Turn your cell phone off (YES – OFF) and go outside for 5 minutes and notice that GRASS is really **GREEN!**
- Maintain a sense of humor about yourself (and others).
- Vary your routine (work/exercise). Don't get trapped in a rut.
- Prioritize at work and home and manage your time effectively.
- **ASK FOR/ACCEPT SUPPORT/HELP.** Talk it out with someone you trust.
- Do a five-minute guided or breathing meditation ([Insight Timer](#)/[CALM](#)/[Peloton](#)).

SET BOUNDARIES

Boundaries: Disconnect

- Turn off notifications (email and social media).
- Do not charge your phone beside bed.
- Do not keep phone with you during meals, exercise, or social activities.
- Read a book or magazine rather than your phone or tablet.
- Get away from your PC to do some work, take HEALTHY breaks from the screen, and don't take the laptop with you on weekends or vacations.

Boundaries: Set Limits

- Check email x times per day at designated times (and let clients and colleagues know/expect that).
- Use "away message" when on vacation.
- Limit Social Media to 10 minutes per platform per day, Use a timer (Hunt et. al, 2018).
- Monitor your use (use monitoring apps, check Screen Time on iPhone (VERY SCARY), etc.).
- Use Do Not Disturb (especially when DRIVING)

Melissa G. Hunt, Rachel Marx, Courtney Lipson and Jordyn Young, No More FOMO: Limiting Social Media Decreases Loneliness and Depression, Journal of Social and Clinical Psychology, Vol. 37, Issue 10 (December 2018).

MORE QUICK STRESS-BUSTERS

- Meditate and/or pray. **CONSISTENT** stress reduction occurs with only 10 minutes of **daily meditation** <https://www.meditationlifeskills.com/guided-meditation-for-stress-and-anxiety/>
- Unplug from social media when acutely stressed.
- Exercise. Movement is medicine.
- Eat a healthy diet.
- Cultivate a positive attitude/gratitude list/handwrite a note to a friend.
- Sleep 8 hours/night when possible.
- Avoid overuse of alcohol or prescription drugs. These short term “fixes” mask the problem and can lead to negative health and social consequences.

Nine Steps for Beating Burnout

1. Do not isolate!
2. Declutter (office space, home, drawers, & desk)!
3. Take a *real* vacation (and put your 'away email reply" on)!
4. Connect to a greater life purpose/volunteer!
5. Gratitude lists/journal/jar!
6. Understand perfectionism vs. excellence
7. Create new experiences and cultivate new skills.
8. Treat yourself like a good friend who needs a break (compassion, grace, empathy).
9. **REMEMBER – DON'T OVERDO IT! BE REALISTIC !! We all live ONE DAY AT A TIME!**

Spend quality time with family

Key Take Aways

- *Ahhh...Youth*: Younger, less experienced lawyers working in small firms or bar associations have higher levels of distress symptoms than their more seasoned and experienced peers.
- *Smash the Stigma*: Lawyers don't seek help for their behavioral health problems because they fear someone will find out and it will discredit them and possibly affect their license.
- *HELP is Not a Four Letter Word*: Look for signs in yourself and others and don't be afraid to start that conversation with a colleague.
- *Culture Shift*: Make having a culture of well-being a priority in your firm or practice setting
